DO YOU WANT TO BE PAID?

Of course, you, as well as other physicians, want to be paid for services. For 20 years we have been the credit doctor in thousands of medical offices.

Briefly, here is the story:

We approach the debtor in a friendly and reasonable way and he finds us so easy to deal with that arrangements are made to settle the account in a spirit of fairness and good-will by both sides. The patient, on his side, tells us his financial condition and we arrange the terms to make it comfortable for him to pay. This is a radical departure from collection agency procedure and it has proven its worth in thousands of doctors' offices by collecting a higher percentage of accounts than any other method.

LET'S LOOK AT THE RECORDS—Typical 1945 tensilgram *(at left)* compared with average 1946 tensilgram. Red curves show breaking points. Current production of all sizes of Ethicon Sutures is 30% stronger on knot pull. Uniformity of strength is shown by closely-grouped breaking points. Tensilgrams are daily records of strength tests on each lot produced in our laboratories.

You get 30% greater strength

In Ethicon's NEW BONDED Catgut

Stronger than ever! That's the story of the Ethicon Catgut you will use in your operating rooms this year.

Now the new *Bonded* Ethicon Sutures are 30% stronger than our previous production, which was always in excess of U.S.P. standards.

As every surgeon knows, the greatest suture strain is in knot-tying. Now you have greater security than ever at this decisive stage.

The several ribbons of raw gut that are spun into a sturdy Ethicon strand are now *bonded together more firmly than ever* as a result of new processes in our laboratories.

Greater Uniformity of Tensile Strength

Breakage test records on our new product also show a high degree of *uniformity* of strength *along each strand* and *from strand to strand.*

In the new Ethicon Sutures you have assurance of dependable handling quality and prolonged integrity in tissue. When desirable, smaller sizes may be used, reducing foreign body reaction.

* * *

When the suture nurse tells you, "That's Ethicon, Doctor," you'll know there's nothing better.

SILK SUTURES...

prepared for meticulous surgery

Maximal strength of strand and minimal bulk are combined in Ethicon's Tru-Formed Black Braided Silk Sutures. You get continued holding strength and minimal tissue reaction.

Strictly U.S.P. gauge. Non-capillary. Serum-proof. Non-toxic. Minimal adherence to tissue. Forms smooth, firm knots.
